

Edmonton, June 1, 2006 - Canadian Western Bank (CWB on TSX) today announced record quarterly net income and total revenues in its 72nd consecutive profitable quarter, a period spanning 18 years. Second quarter net income of \$16.7 million increased 37% over the same quarter last year while diluted earnings per share of \$0.52 were up 33%. Total loans increased 5% in the quarter and 24% in the past year, pushing total assets to \$6.5 billion. Year-to-date, net income of \$33.1 million was up 36% over the same period last year while diluted earnings per share were up 33%.

The Board of Directors today declared a quarterly dividend of \$0.12 per common share, payable on July 6, 2006 to shareholders of record on June 15, 2006. This is consistent with the previous quarterly dividend and represents an increase of 20% over the quarterly dividend declared in June 2005.

Second Quarter Financial Highlights

(three months ended April 30, 2006 compared with three months ended April 30, 2005 unless otherwise noted)

- Record quarterly net income of \$16.7 million, up 37%.
- Diluted earnings per share for the quarter of \$0.52, up 33%.
- Record total revenues (teb¹) of \$53.0 million, up 20%.
- Return on equity of 14.3%, an increase of 260 basis points.
- Efficiency ratio (teb) of 47.1%, an improvement of 320 basis points.
- Loan growth of 5% in the second quarter and 24% in the last 12 months.
- Lower cost demand and notice deposits of \$1.5 billion, up 31%.

¹ Taxable equivalent basis. See definition following Financial Highlights table on page two.

“The Bank’s history of growth and strong financial performance continued in the second quarter,” said Larry Pollock, President and CEO. “Net income in the quarter exceeded our very strong first quarter earnings. This performance is quite an achievement given that the second quarter has three fewer interest-earning days,” added Mr. Pollock.

Total loans increased 5% in the quarter and 12% in the last six months, meeting the Bank’s target for the full year. “We continue to see very high levels of business activity and strong credit quality within all lending sectors and across all four western provinces, further supporting our strategic choice of markets and locations,” said Mr. Pollock.

Both operating segments posted strong results in the second quarter during which income from banking and trust operations increased 39% to reach record levels for the fourth consecutive quarter. Insurance earnings of \$1.6 million were up 25% on continued positive underwriting performance and increased investment income.

⁽¹⁾ bp - Basis point change.

Taxable Equivalent Basis (teb)

Most banks analyse revenue on a taxable equivalent basis to permit uniform measurement and comparison of net interest income. Net interest income (as presented in the consolidated statement of income) includes tax-exempt income on certain securities. Since this income is not taxable, the rate of interest or dividends received is significantly lower than would apply to a loan or security of the same amount. The adjustment to taxable equivalent basis increases interest income and the provision for income taxes to what they would have been had the tax-exempt securities been taxed at the statutory rate. The taxable equivalent basis does not have a standardized meaning prescribed by generally accepted accounting principles (GAAP) and therefore may not be comparable to similar measures presented by other banks.

Message to Shareholders

Your Bank is pleased to report very strong results for the second quarter of 2006, highlighted by 5% loan growth and new records for quarterly net income and total revenues (teb). The period was also Canadian Western Bank's 72nd consecutive profitable quarter, a period spanning 18 years.

Second quarter net income and diluted earnings per share were up 37% and 33% respectively over the same quarter last year. On a year-to-date basis, net income increased 36% while diluted earnings per share were up 33%. These results reflect the ongoing success of our focused business plan as well as the current strong economic conditions in Western Canada. The Bank's assets now total \$6.5 billion, with growth of \$1.2 billion or 23% coming in the last 12 months.

Disclosure Procedures

Prior to its release, this quarterly report to shareholders was reviewed by the Audit Committee and approved by the Board of Directors of Canadian Western Bank (CWB), on the Audit Committee's recommendation, consistent with our practice in prior quarters.

Share Price Performance

CWB shares ended the second quarter at \$42.49, up from \$27.31 one year ago. Including reinvested dividends, return to shareholders was 56% over this period which compares very favorably to the 22% return on the S&P/TSX Financials Index over the same timeframe.

Dividends

At their meeting on June 1, 2006, CWB's Board of Directors declared a quarterly dividend of \$0.12 per common share, payable on July 6, 2006 to shareholders of record on June 15, 2006. This is consistent with the previous quarterly dividend and represents an increase of 20% over the quarterly dividend declared in June 2005.

Loan Growth

Loans increased 5% in the second quarter reflecting continued high volumes of economic activity in Western Canada and CWB's growing market share. Geographically, the bulk of our growth continues to come from Alberta and British Columbia where CWB has the greatest presence and where economic conditions are the strongest. Our growth has been balanced among real estate, general commercial, industrial and personal lending classifications. Year-to-date, total loans increased 12%, meeting our target for fiscal 2006 in only six months. In the last 12 months, total loans have grown 24%.

At April 30, 2006, sub-prime mortgage balances totaled \$152 million, an increase of \$33 million during the quarter and \$72 million year-to-date. Through six months we have nearly met our annual goal of doubling outstanding balances in this business.

Net Interest Margin

The Bank's net interest margin (teb) was 2.64% in the quarter, down slightly from the prior quarter and consistent with the same quarter last year, as prosperous economic conditions across Western Canada are leading to increased competition and tighter pricing on loans in general. We have generally been successful in maintaining margins due to reductions in funding costs achieved through growth in internally raised low cost deposits. At the end of the second quarter, 66% of all deposits

were internally generated through our branch system and Canadian Western Trust, as compared to 64% one year ago. Within these deposits, the lower cost demand and notice component now comprises 27% of total deposits, up from 25% a year ago. While these are relatively small shifts, they have a significant impact on the Bank's margin and earnings.

Credit Quality

Credit quality continues to be very strong and stable as reflected in unusually low levels of gross impaired loans. Positive economic conditions in Western Canada coupled with a continued disciplined credit approach have allowed us to reduce our provisions as a percentage of average loans while still building our general allowance for losses. Provisions for credit losses were 20 basis points of average loans in the second quarter.

Trust Services

Both our Trust Services businesses, Canadian Western Trust Company and Valiant Trust Company continued to perform very well in the second quarter. Trust fee revenues of \$2.7 million were up 45% over the same quarter last year. Valiant Trust's revenues were particularly strong in the quarter, benefiting from larger trust account balances due to increased business volumes as well as higher interest rates on those balances. Total trust assets under administration continued to grow and totaled \$3.1 billion at quarter end, up 31% from a year ago.

Insurance

Earnings from our insurance subsidiary, Canadian Direct Insurance Incorporated, were \$1.6 million in the second quarter, up 25% from the same quarter last year. While CWB acquired this company only two years ago, Canadian Direct has just celebrated their 10th anniversary. In this time, the company has attracted more than 150,000 policyholders and established a reputation for outstanding customer service. We continue to be very satisfied with the ongoing performance and stability of Canadian Direct and are now looking at opportunities for further growth within this pillar of the financial services industry.

Outlook

Canadian Western Bank's success has always been built on the solid execution of a proven business plan based upon offering western Canadian customers a high-service, local alternative to larger national financial institutions. With continued focus on this strategy and the very positive outlook for the economy of Western Canada, we remain optimistic about the prospects for our banking, trust and insurance businesses during the remainder of fiscal 2006 and beyond. Our challenge going forward will be to ensure we have the people, processes and infrastructure to successfully manage this growth and enhance our businesses.

We look forward to reporting our third quarter results on September 7, 2006.

On behalf of the Board of Directors,

Larry Pollock
President and Chief Executive Officer

Management's Discussion and Analysis

This management's discussion and analysis (MD&A) should be read in conjunction with the unaudited interim consolidated financial statements for the period ended April 30, 2006, as well as the audited consolidated financial statements and MD&A for the year ended October 31, 2005, which are available on SEDAR at www.sedar.com. Except as discussed below, the factors discussed and referred to in the MD&A for fiscal 2005 remain substantially unchanged.

Overview

Canadian Western Bank (CWB or the Bank) recorded net income of \$16.7 million in the second quarter, an increase of 37% (\$4.5 million) over the same quarter last year. These record earnings marked the Bank's 72nd consecutive quarter of profitability, an 18-year period. The consolidated results included record banking and trust segment earnings of \$15.1 million and a \$1.6 million contribution from Canadian Direct Insurance Incorporated (Canadian Direct).

Total revenues on a tax equivalent basis (teb - see definition following Financial Highlights table) increased 20% over the second quarter last year with record net interest income and other income. Net interest income (teb) increased 20% year-over-year, benefiting from 24% loan growth and 31% growth in lower cost deposits. Other income, which includes net revenues from insurance operations, increased 19% over the same period.

Second quarter net income increased 1% (\$229,000) from the first quarter as a result of a 6% increase in average interest-earning assets offset by the impact of three fewer days in the second quarter. Net interest income (teb) per day, a measure that excludes this impact, increased 4% over the previous quarter and 20% over the second quarter last year to \$450,000. Net income was \$33.1 million year-to-date, up 36% over the same period last year.

Diluted earnings per share of \$0.52 (\$0.54 basic) in the second quarter were up 33% from \$0.39 (\$0.40 basic) one year ago. Return on equity improved to 14.3% in the quarter from 11.7% in the same quarter last year and return on assets was 1.10% compared to 0.96% one year ago.

Year-to-date diluted earnings per share were \$1.05 (\$1.08 basic), up 33% from \$0.79 (\$0.82 basic) in the same period last year. Return on equity of 14.2% and return on assets of 1.10% year-to-date compare positively to 11.9% and 0.97% respectively in the prior year period.

Total Revenues (teb)

Total revenues (teb), which are comprised of net interest income and other income, were a record \$53.0 million in the quarter, up 20% (\$8.9 million) over the second quarter last year and 1% (\$701,000) over the longer first quarter. Year-to-date, total revenues (teb) were \$105.3 million, up 21% (\$17.9 million) over the first six months of fiscal 2005.

Net Interest Income (teb)

Net interest income (teb) totaled \$40.1 million in the quarter, an increase of 20% (\$6.8 million) over one year ago. This increase reflects 21% growth in average interest-earning assets and a stable net interest margin (teb) of 2.64%. On a year-to-date basis, net interest income (teb) of \$79.8 million increased 21% (\$13.8 million) over one year ago. Net interest margin (teb) was 2.66% compared to 2.62% in the prior year period with the increase primarily due to improved deposit mix, partially offset by higher debenture interest costs.

In comparison to the first quarter, net interest income increased 1% (\$344,000) as a result of a 6% increase in average interest earning assets offset by a reduction in net interest margin (teb) to 2.64% from 2.68% and the impact of three fewer days. The decline in margin was primarily due to a reduction in amortized loan fees and recoveries.

Note 8 to the unaudited interim financial statements summarizes the Bank's interest rate risk position as at April 30, 2006. Interest rate risk or sensitivity is defined as the impact on net interest income, both current and future, resulting from a change in market interest rates. Based on the interest rate gap position as at April 30, 2006, it is estimated that a one percentage point increase in all interest rates would increase net interest income by approximately 1.0%. This compares to January 31, 2006, when a one percentage point increase in all interest rates would have caused an increase in net interest income of approximately 0.3%.

Other Income

Other income for the second quarter of \$13.0 million was up 20% (\$2.1 million) over the same quarter last year. The increase primarily reflects growth in credit related fees (\$1.1 million) and trust fees (\$833,000). Year-to-date, other income was \$25.5 million, an increase of 19% (\$4.1 million), reflecting strong growth in credit fees, trust fees and net insurance revenues.

In comparison to the previous quarter, other income increased 3% (\$357,000) due primarily to higher net insurance revenues (\$205,000) and trust fees (\$151,000) partially offset by the impact of three fewer days in the second quarter.

At April 30, 2006, unrealized losses in the securities portfolio totaled \$4.1 million compared to \$1.9 million at the end of the first quarter and \$12,000 one year ago. Changes in unrealized losses over the previous quarter and the past year primarily reflect changes in interest rates and the yield curve. Investments within the securities portfolio are not held for trading, purposes and are typically held until maturity.

Credit Quality

Credit quality remained strong with the second quarter provision for credit losses at 20 basis points of average loans, compared to 22 basis points in the previous quarter and 25 basis points one year ago.

At the end of the second quarter, gross impaired loans totaled \$11.4 million, compared to \$12.9 million at the end of the first quarter and \$21.8 million one year ago. The decline from the previous quarter was due to the successful resolution of problem accounts as well as fewer new impaired loans in the current strong credit environment. Over the last two years, gross impaired loans have remained at historically low levels. The dollar level of gross impaired loans is expected to fluctuate over time within the Bank's range of acceptable levels as loans become impaired and are subsequently resolved. Overall, the quality of the loan portfolio is expected to remain strong.

The Bank's total allowance for credit losses (general and specific) represented 409% of gross impaired loans at April 30, 2006, compared to 346% at the end of the previous quarter and 201% one year ago. The general allowance was 82 basis points of risk-weighted loans at April 30, 2006, compared to 80 basis points at the end of the first quarter and 84 basis points one year ago.

Non-interest Expenses

Non-interest expenses of \$24.9 million in the second quarter increased 12% (\$2.8 million) over the same quarter in 2005. This increase was the result of additional costs associated with increased staffing levels due to business growth, annual salary adjustments, increased variable compensation and non-cash stock-based compensation, new and expanded premises, and various other initiatives. In comparison to the previous quarter, non-interest expenses increased 2% (\$603,000). Year-to-date, non-interest expenses of \$49.3 million increased 13% (\$5.8 million) over the comparative prior year period reflecting the items noted above.

CWB's industry leading efficiency ratio (teb), which measures non-interest expenses as a percentage of total revenues was 47.1% in the quarter, compared to 46.5% in the previous quarter and 50.3% in the same quarter last year. The increase in the efficiency ratio from the previous quarter reflects the impact of three fewer days in the second quarter. Year-to-date, the efficiency ratio (teb) was 46.8%, an improvement of 300 basis points from one year ago.

Income Taxes

The income tax rate (teb) was 35.0% for the first six months of 2006, compared to 37.2% one year ago, while the tax rate before the teb adjustment for the same period was 32.6% compared to 34.3% in the prior year. These lower rates reflect reduced provincial income tax rates in all four western provinces. Looking forward, overall tax rates will also benefit from announced reductions in federal income tax rates beginning in 2008.

Balance Sheet

At April 30, 2006 total assets were \$6,476 million, an increase of 8% (\$454 million) in the second quarter and 23% (\$1,215 million) in the last year.

Cash and Securities

Cash, securities and securities purchased under resale agreements totaled \$1,193 million at the end of the second quarter, compared to \$974 million at January 31, 2006 and \$977 million one year ago.

Loans

Total loans were \$5,144 million at April 30, 2006, an increase of 5% (\$231 million) in the quarter and 24% (\$988 million) in the past year. The quarterly growth was evenly distributed geographically, between Alberta (\$117 million) and British Columbia (\$107 million) and across real estate, industrial, general commercial and personal lending sectors. New loan deal flow remains healthy and at the midway point of the fiscal year, the Bank has already achieved its 17th consecutive year of double-digit loan growth, with year-to-date growth of 12%.

Deposits

At April 30, 2006, deposits raised through the Bank's branch network and Canadian Western Trust Company (CWT) totaled \$3,695 million, an increase of 7% (\$241 million) in the quarter and 28% (\$812 million) in the last twelve months. The lower cost demand and notice component increased 14% (\$180 million) in the quarter and 31% (\$355 million) in the past year.

A portion of the year-over-year growth in total branch deposits reflects larger commercial and wholesale balances, which can be subject to greater fluctuation.

Branch deposits comprised 66% of total deposits at the end of the second quarter, compared to 67% at the end of the first quarter and 64% at April 30, 2005. Lower cost demand and notice deposits were 27% of total deposits at April 30, 2006, compared to 25% at both the end of the previous quarter and one year ago. Improvements in deposit mix generally reduce funding costs and contribute to the stability of the net interest margin.

At the end of the second quarter, total deposits, which also include deposits raised through an agent network and corporate wholesale balances, were \$5,563 million, an increase of 8% (\$407 million) in the quarter and 23% (\$1,041 million) in the last twelve months.

Other Assets and Other Liabilities

Other assets were \$138 million at April 30, 2006, compared with \$135 million at January 31, 2006 and \$127 million a year ago. Other liabilities of \$229 million compared to \$196 million at the end of the previous quarter and \$177 million one year ago.

Off-Balance Sheet

Off-balance sheet assets include trust assets under administration, which totaled \$3,106 million at April 30, 2006 compared to \$2,972 million at the end of the first quarter and \$2,375 million one year ago. Other off-balance sheet assets relate to standard industry credit instruments (guarantees, standby letters of credit and commitments to extend credit) and derivative financial instruments (primarily interest rate swaps) used to manage sensitivity to interest rate changes. Additional information on off-balance sheet assets is provided in the audited consolidated financial statements for the year ended October 31, 2005 filed on SEDAR at www.sedar.com.

Capital Management

CWB's total capital adequacy ratio, which measures regulatory capital as a percentage of risk-weighted assets, was 12.7% at the end of the second quarter, compared to 13.0% at the end of the first quarter and 13.2% one year ago. The Tier 1 ratio was 8.9% at April 30, 2006, compared to 9.1% at the end of the previous quarter and 10.1% one year ago. The decreases in the total and Tier 1 capital ratios reflect significant asset growth. The Bank's Tier 1 capital is of the highest quality, comprised entirely of shareholders' equity, net of goodwill. The Bank remains well-capitalized relative to regulatory requirements and additional capital will be sought, as required, to support future growth.

At April 30, 2006, book value per common share was \$15.79, compared to \$15.39 at January 31, 2006 and \$14.17 one year ago.

On April 6, 2006, common shareholders received a quarterly cash dividend of \$0.12 per common share. Subsequent to quarter end, the Board of Directors declared a quarterly dividend of \$0.12 per share payable on July 6, 2006 to shareholders of record on June 15, 2006. This represents an increase of 20% over the dividend declared in June 2005.

Management's Discussion and Analysis (continued)

Accounting Policies and Critical Accounting Estimates

The notes to the Bank's October 31, 2005 audited consolidated financial statements outline our significant accounting policies. There were no new significant accounting policies adopted in the first two quarters for purposes of presenting the Bank's financial statements under Canadian generally accepted accounting principles.

Included on pages 40 and 41 of the Bank's 2005 Annual Report is a discussion of certain accounting policies considered particularly important as they require management to make significant estimates or judgments, some of which may relate to matters that are inherently uncertain.

Updated Share Information

As at May 26, 2006 there were 30,778,878 common shares outstanding. Also outstanding were employee stock options, which are or will be exercisable for up to 2,203,570 common shares (2,727,144 authorized) for maximum proceeds of \$45.1 million.

For details on variations between the prior quarters see the summary of quarterly results section of the Bank's MD&A for the year ended October 31, 2005 and the individual quarterly reports to shareholders which are available on SEDAR at www.sedar.com.

Results by Business Segment

CWB operates in two business segments: 1) banking and trust, and 2) insurance.

Banking and Trust

The operations of the banking and trust segment include commercial and retail banking services as well as personal and corporate trust services provided through CWB's wholly owned subsidiaries, CWT and Valiant Trust Company.

The banking and trust segment generated net income of \$15.1 million in the second quarter, an increase of 39% (\$4.2 million) over the same quarter last year. With these earnings, this segment posted record net income for the fourth consecutive quarter. Total revenues (teb) grew 21% (\$8.5 million) over the second quarter last year reflecting a 21% increase in average loans, a stable net interest margin, as well as strong growth in credit related and trust fees. Non-interest expenses increased 13% (\$2.7 million) year-over-year reflecting additional costs

associated with increased staffing levels due to business growth, annual salary adjustments, increased variable compensation and non-cash stock-based compensation, new and expanded premises and various other initiatives. With growth in revenues exceeding expense growth, the efficiency ratio improved 330 basis points to 47.2%.

In comparison to the first quarter, segment earnings increased 1% (\$163,000) reflecting 6% growth in average loans and strong growth in trust fees offset by the impact of three fewer days in the second quarter. Banking and trust segment net interest income per day, which excludes the impact of the three fewer days, was \$441,000 in the second quarter, an increase of 4% over the previous quarter.

Year-to-date, segment net income of \$30.1 million increased 36% (\$8.0 million) over the prior year period reflecting 19% growth in average loans, 23% growth in other income, an increased net interest margin. Year-over-year, the efficiency ratio (teb) improved 300 basis points to 46.9%.

Management's Discussion and Analysis (continued)

Insurance

The insurance segment consists of the operations of CWB's wholly owned subsidiary Canadian Direct Insurance, which provides home and automobile insurance directly to individuals in British Columbia and Alberta.

Canadian Direct generated net income of \$1.6 million in the second quarter, an increase of 25% (\$307,000) over the same quarter last year. This increase reflects increased investment income and additional net insurance revenues from growth in the number of policies outstanding and a reduction in the use of quota share reinsurance. The second quarter claims loss

ratio was 64%, up from 61% in the same quarter last year reflecting a slight increase in the frequency and severity of home insurance claims. The expense ratio was 27% in the second quarter, an improvement from 29% one year ago.

Compared to the previous quarter, net income increased 4% reflecting additional net revenues from an improved claims experience, partially offset by increased policy acquisition costs and the impact of three fewer premium-earning days in the second quarter. Year-to-date, Canadian Direct's net income of \$3.1 million has increased 31% (\$719,000) over the first six months of 2005.

⁽²⁾ Policy acquisition costs and non-interest expenses net of commissions and processing fees as a percentage of net earned premiums.

⁽³⁾ Sum of the claims loss and expense ratios.

Fiscal 2006 Targets

The performance targets established for the 2006 fiscal year are presented in the table below together with CWB's actual performance to date.

	2006 Target	2006 YTD Performance ⁽¹⁾
Net income growth	18% or greater	36%
Total revenue (teb) growth	15%	21%
Loan growth	12%	24%
Provision for credit losses as a percentage of average loans	0.22% or less	0.21%
Efficiency ratio (teb)	48% or less	46.8%
Return on equity	13% or greater	14.2%
Return on assets	1.05%	1.10%

⁽¹⁾ 2006 YTD Performance for earnings and revenue growth is the current year results over the same period in the prior year, loan growth is the increase over the past twelve months and performance for ratio targets is the current year-to-date results annualized.

Through the first six months of 2006, CWB is exceeding all annual performance targets and surpassing key targets for income, revenue and loan growth by considerable margins. Total loans have increased by 12% in just six months, meeting the growth target for the entire year. With this growth already on the books, we are optimistic that we will meet or exceed all annual performance targets. While new loan deal flow remains healthy and the current economic conditions should continue to fuel growth, the strong economy also leads to increased competition, tighter loan pricing and greater liquidity in the market.

We continue to be pleased with the progression in the Bank's return on equity (ROE). Our progress has been possible due to the strong performance of all lines of business. Going forward, we will look to further improve ROE through continued diversification into higher margin or less capital intensive businesses and by funding asset growth, to the extent possible, through non-dilutive forms of capital.

This management's discussion and analysis is dated as of June 1, 2006.

Taxable Equivalent Basis (teb)

Most banks analyse revenue on a taxable equivalent basis to permit uniform measurement and comparison of net interest income. Net interest income (as presented in the consolidated statement of income) includes tax-exempt income on certain securities. Since this income is not taxable, the rate of interest or dividends received is significantly lower than would apply to a loan or security of the same amount. The adjustment to taxable equivalent basis increases interest income and the provision for income taxes to what they would have been had the tax-exempt securities been taxed at the statutory rate. The taxable equivalent basis does not have a standardized meaning prescribed by generally accepted accounting principles (GAAP) and therefore may not be comparable to similar measures presented by other banks.

Canadian Banking Industry

Comparative performance indicators of the Canadian banking industry referred to in this document are obtained from the published results of the other publicly-traded Schedule I banks (BMO Financial Group, Canadian Imperial Bank of Commerce, Laurentian Bank of Canada, National Bank of Canada, RBC Financial Group, Scotiabank and TD Bank Financial Group). Readers are cautioned that the banks in this industry group have operations and asset size that may not be directly comparable to each other or to Canadian Western Bank.

Forward-looking Statements

From time to time Canadian Western Bank (the "Bank") makes written and verbal forward-looking statements. Statements of this type are included in the Annual Report and reports to shareholders and may be included in filings with Canadian securities regulators or in other communications such as press releases and corporate presentations. Forward-looking statements include, but are not limited to, statements about the Bank's objectives and strategies, targeted and expected financial results and the outlook for the Bank's businesses or for the Canadian economy. Forward-looking statements are typically identified by the words "believe", "expect", "anticipate", "intend", "estimate", "may increase", "may impact" and other similar expressions or future or conditional verbs such as "will", "should", "would" and "could".

By their very nature, forward-looking statements involve numerous assumptions. A variety of factors, many of which are beyond the Bank's control, may cause actual results to differ materially from the expectations expressed in the forward-looking statements. These factors include, but are not limited to, fluctuations in interest rates and currency values, changes in monetary policy, changes in economic and political conditions, legislative and regulatory developments, the level of competition in the Bank's markets, the occurrence of weather related and other natural catastrophes, the accuracy of and completeness of information the Bank receives about customers and counterparties, the ability to attract and retain key personnel, the ability to complete and integrate acquisitions, reliance on third parties to provide components of the Bank's business infrastructure, changes in tax laws, technological developments, unexpected changes in consumer spending and saving habits, timely development and introduction of new products, and management's ability to anticipate and manage the risks associated with these factors. The preceding list is not exhaustive of possible factors. These and other factors should be considered carefully and readers are cautioned not to place undue reliance on these forward-looking statements. The Bank does not undertake to update any forward-looking statement, whether written or verbal, that may be made from time to time by it or on its behalf.

Notes to Interim Consolidated Financial Statements

(unaudited)
(\$ thousands, except per share amounts)

1. Basis of Presentation

These unaudited interim consolidated financial statements have been prepared in accordance with Canadian generally accepted accounting principles (GAAP), including the accounting requirements of the Superintendent of Financial Institutions Canada (OSFI), using the same accounting policies as the audited consolidated financial statements for the year ended October 31, 2005. Under Canadian GAAP, additional disclosures are required in annual financial statements and accordingly, these unaudited interim consolidated financial statements should be read in conjunction with the audited consolidated financial statements for the year ended October 31, 2005 as set out on pages 45 to 70 of the Bank's 2005 Annual Report.

2. Insurance Income

Insurance income reported in other income on the consolidated statement of income is presented net of claims, adjustment and policy acquisition expenses.

4. Subordinated Debentures

On November 21, 2005, the Bank issued \$70,000 of conventional subordinated debentures with a fixed interest rate of 5.426% until November 21, 2010. Thereafter the rate will be reset quarterly at the Canadian dollar CDOR 90-day Bankers' Acceptance rate plus 180 basis points until maturity on November 21, 2015. The Bank may redeem the debentures on or after November 22, 2010 with the approval of OSFI.

Exercisable at end of period	444,170	\$ 10.78	528,922	\$ 10.15

The terms of the share incentive plan allow the holders of vested options a cashless settlement alternative whereby the option holder can either (a) elect to receive shares by delivering cash to the Bank in the amount of the option exercise price or (b) elect to receive the number of shares equivalent to the excess of the market value of the shares under option over the exercise price. Of the 184,192 options (2005 - 522,978) exercised or exchanged in the six months ended April 30, 2006, option holders exchanged the rights to 122,492 options (2005 - 236,784) and received 88,664 shares (2005 - 132,287) in return under the cashless settlement alternative.

In the six months ended April 30, 2006, salary expense of \$1,190 (2005 - \$734) was recognized relating to the estimated fair value of options granted since November 1, 2002. The fair value of options granted was estimated using a binomial option pricing model with the following variables and assumptions: (i) risk-free interest rate of 4.0% (2005 - 3.6%), (ii) expected option life of 4.0 years (2005 - 3.9 years), (iii) expected volatility of 19% (2005 - 18%), and (iv) expected dividends of 1.3% (2005 - 1.6%). The weighted average fair value of options granted was estimated at \$6.70 (2005 - \$3.67) per share.

During the second quarter, 750,000 additional options (including 390,750 granted in the fourth quarter of 2005) received shareholder and Toronto Stock Exchange approval.

Notes to Interim Consolidated Financial Statements (continued)

6. Contingent Liabilities and Commitments

Significant contingent liabilities and commitments, including guarantees provided to third parties, are discussed in Note 20 of the Bank's audited consolidated financial statements for the year ended October 31, 2005 (see page 63 of the 2005 Annual Report) and include:

	As at April 30 2006	As at January 31 2006	As at April 30 2005
Guarantees and standby letters of credit			
Balance outstanding	\$ 136,550	\$ 130,941	\$ 102,548
Business credit cards			
Total approved limit	5,855	5,374	3,321
Balance outstanding	1,208	1,181	749

In the ordinary course of business, the Bank and its subsidiaries are party to legal proceedings. Based on current knowledge, the Bank does not expect the outcome of any of these proceedings to have a material effect on the consolidated financial position or results of operations.

7. Trust Assets Under Administration

Trust assets under administration represent assets held for personal and corporate trust clients, administered by subsidiaries, and are kept separate from the subsidiaries' own assets. Trust assets under administration are not reflected in the consolidated balance sheet and relate to the banking and trust segment.

	As at April 30 2006	As at January 31 2006	As at April 30 2005
Trust assets under administration	\$ 3,105,873	\$ 2,972,357	\$ 2,374,664

8. Interest Rate Sensitivity

The Bank's exposure to interest rate risk as a result of a difference or gap between the maturity or repricing behavior of interest sensitive assets and liabilities, including off-balance sheet items, is discussed in Note 23 of the audited consolidated financial statements for the year ended October 31, 2005 (see page 65 of the 2005 Annual Report). The following table shows the gap position for selected time intervals.

(\$ millions)	Floating Rate Rate or Within 1 Month	1 to 3 Months	3 Months to 1 Year	Total Within 1 Year	1 Year to Five Years	Over 5 Years	Non- interest Sensitive	Total

Notes to Interim Consolidated Financial Statements (continued)

9. Segmented Information

The Bank operates principally in two industry segments - banking and trust, and insurance. These two segments differ in products and services but are both within the same geographic region. The banking and trust segment provides services primarily to personal clients and small to medium-sized commercial business clients in western Canada. The insurance segment provides home and automobile insurance direct to individuals in British Columbia and Alberta.

⁽¹⁾ Taxable Equivalent Basis (teb) - Most banks analyse revenue on a taxable equivalent basis to permit uniform measurement and comparison of net interest income. Net interest income (as presented in the consolidated statement of income) includes tax-exempt income on certain securities. Since this income is not taxable, the rate of interest or dividends received is significantly lower than would apply to a loan or security of the same amount. The adjustment to taxable equivalent basis increases interest income and the provision for income taxes to what they would have been had the tax-exempt securities been taxed at the statutory rate. The taxable equivalent basis does not have a standardized meaning prescribed by generally accepted accounting principles (GAAP) and therefore may not be comparable to similar measures presented by other banks.

⁽²⁾ Other income for the insurance segment is presented net of net claims, adjustment expenses and policy acquisition expenses.

⁽³⁾ Assets are disclosed on an average daily balance basis as this measure is most relevant to a financial institution and is the measure reviewed by management.

10. Future Accounting Changes

Financial Instruments

The Canadian Institute of Chartered Accountants has issued three new accounting standards: *Financial Instruments - Recognition and Measurement*, *Hedges*, and *Comprehensive Income*, which are effective for the Bank as of November 1, 2006. As a result of adopting these standards, a new category, Other Comprehensive Income, will be added to Shareholders' Equity and certain unrealized gains or losses will be reported in other comprehensive income until realization. The impact of these new standards on the Bank's financial statements is not yet determinable as it will be dependent on the Bank's outstanding positions and their fair values at the time of implementation.

11. Comparative Figures

Certain of the comparative figures have been reclassified to conform to the current period's presentation.
